

THE "CIGAR O RAMA" TOBACCO SMOKING PIPE AND QUIT SMOKING AID
ABSTRACT

- 33) A cigar shaped tobacco smoking pipe having a draw piece (14) with a band (12) at its distal end and adapted to receive either proximal or distal end of a bowl piece (16). A bore (18) communicates with either an end-smoking cavity (20) or a transverse-smoking cavity (22) or both to carry an aroma or smoke mixture to a chamber (10) then on through a draw piece (14). Both the proximal and distal ends of the movable bowl piece (16) are adapted to receive the distal end of the draw piece (14).
